EXPERIENCE

Data Scientist

Jan 2022 – Present

University of South Florida Athletics | Tampa, FL

- **CRM & Audience Management**
 - Administered CRM platform day-to-day including data hygiene audits, deduplication, tagging, lead distribution, and integration architecture across sales, marketing, and ticketing workflows.
 - Developed and deployed 15+ embedded lead-capture forms (Qualtrics/FTS) generating 15,000+ leads; segmented an audience base of 800K+ across email, app, SMS, and sales channels.
 - Collaborated with FanThreeSixty and Salesforce CRM environment for querying data, pulling segmented reports, and supporting data governance to inform sales and marketing strategies.
- **Pricing, Revenue & Inventory Optimization**
 - Architected a unified pricing engine across all 9 ticketed sports (primary & secondary markets) using a Python rules engine, generating elasticity coefficients shared with executive stakeholders to guide dynamic pricing decisions.
 - Drove a 36% increase in revenue through ML-powered pricing strategy, demand forecasting, and secondary market monitoring.
- **Business Intelligence & Reporting**
 - Built and maintained executive-level dashboards covering pricing, sales, attendance, revenue, CRM, marketing attribution, serving as the department's staple.
 - Delivered daily multi-sport reports and budget variance trackers used by executive leadership for strategic decision-making.
- **Predictive Analytics & Machine Learning**
 - Developed machine learning models (boosting, logistic regression) for ticket sales, attendance, and revenue forecasting across 9 ticketed sports, directly informing inventory management, dynamic pricing, and staffing decisions, including renewal probability models achieving 90%+ retention and season ticket holder segmentation with 8% higher conversion rates.
 - Conducted UTM tracking and marketing attribution analysis, identifying 3+ high-ROI channels and improving fan engagement by 50%.
- **AI & LLM Automation**
 - Built NLP models for open-ended survey classification, cutting processing time from 2–4 hours to 5–10 minutes; integrated Llama 3 LLM to automate feedback summarization for instant stakeholder insights.
 - Developed AI-powered ticketing chatbots (BATA & BUMA) using OpenAI, supporting 10+ staff members in data-driven decision-making.
 - Integrated Rocky Bot chatbot on the USF Athletics website via Azure, expanding AI-driven fan engagement.

Data Analytics Intern

Jan 2022 – May 2022

Publix Super Markets | Lakeland, FL

- Built a supervised recommender system in Python improving inventory accuracy by 5% across 1,300+ stores without additional labor.
- Extracted and analyzed 1M+ records via complex SQL queries in Teradata for predictive modeling and outlier detection.

Data Analyst

Oct 2021 – Mar 2022

National Senior Games Association | Tampa, FL

- Analyzed COVID-19 impact on 6,000+ members using Python, R (Chi-Square, Logistic Regression, ANOVA), and Power BI KPI dashboards; published findings in a research article.

EDUCATION

M.S. Business Analytics & Information Systems (Analytics & Business Intelligence) <i>University of South Florida, Tampa, FL</i>	May 2023
B.S. Business Analytics & Information Systems (Cyber-Security) <i>University of South Florida, Tampa, FL</i>	Jul 2021

TECHNICAL SKILLS

Analytics & BI: Power BI, Tableau, Google Analytics
Programming, ML & AI: Python, R, SQL, JavaScript, HTML/CSS; Deep Learning, NLP, LLMs/AI
Engineering & Infrastructure: Hadoop, Apache Spark, Flask, Azure, Streamlit
CRM & Data Platforms: Salesforce & FanThreeSixty (reporting, querying, segmentation), Snowflake, PostgreSQL, Qualtrics
Business Software: Microsoft Office, Archtics (Ticketmaster)
